F O R E W O R D

This Directory of Building Materials Manufactured in Thailand was compiled primarily to assist ASRCT research on building materials in this country.

However, as a similar compilation does not appear to have been distributed in Thailand before, it was decided to print a limited number of copies for distribution.

The Directory was compiled from the answers to questionnaires sent to individual firms. The statements shown in the Directory under "Products made" and "Sizes/Types" are reproduced from replies to questionnaires, no separate check having been made as to their accuracy.

Saw-millers and makers of traditional ("mon") bricks have been omitted since their number is legion and subject to constant change.

ASRCT wishes to thank those firms which appear herein for their cooperation in providing details of their products. ASRCT would appreciate hearing from any other manufacturers of building materials who believe that their products should also be listed.
